

Roco-Plt A/S has more than 40 years of experience with all machinery in the field of plastic welding. That include, butt fusion, electro fusion, extruders, hot air welders and sheet welders and fitting fabrication. Further more we are DS approved for making calibration of all brands of butt fusion machinery Roco-Plt is known for providing the best welding equipment and technical support for it's customers.

Our company is located in the northern part of Denmark, in a small town called Vodskov. Here you will find our sales office, workshop and warehouse.

Roco-Plt does also have a hire fleet of both butt and electro fusion machines along with our own produced internal debader sets.

Our hire fleet for butt fusion machines goes from Ø 63 mm up to Ø 800 mm and up to Ø 1200 mm in electro fusion machines.

In our warehouse we always have machines ready for dispatch together with our stock of spare parts for all brands of butt fusion machines.

At Roco-Plt we offer our customer to make service and calibration at customer location in all of Denmark, Norway and Sweden.

So feel free to call Roco if you need to have service or maintenance on your machinery or if you have an issue that we could help with you solve.
